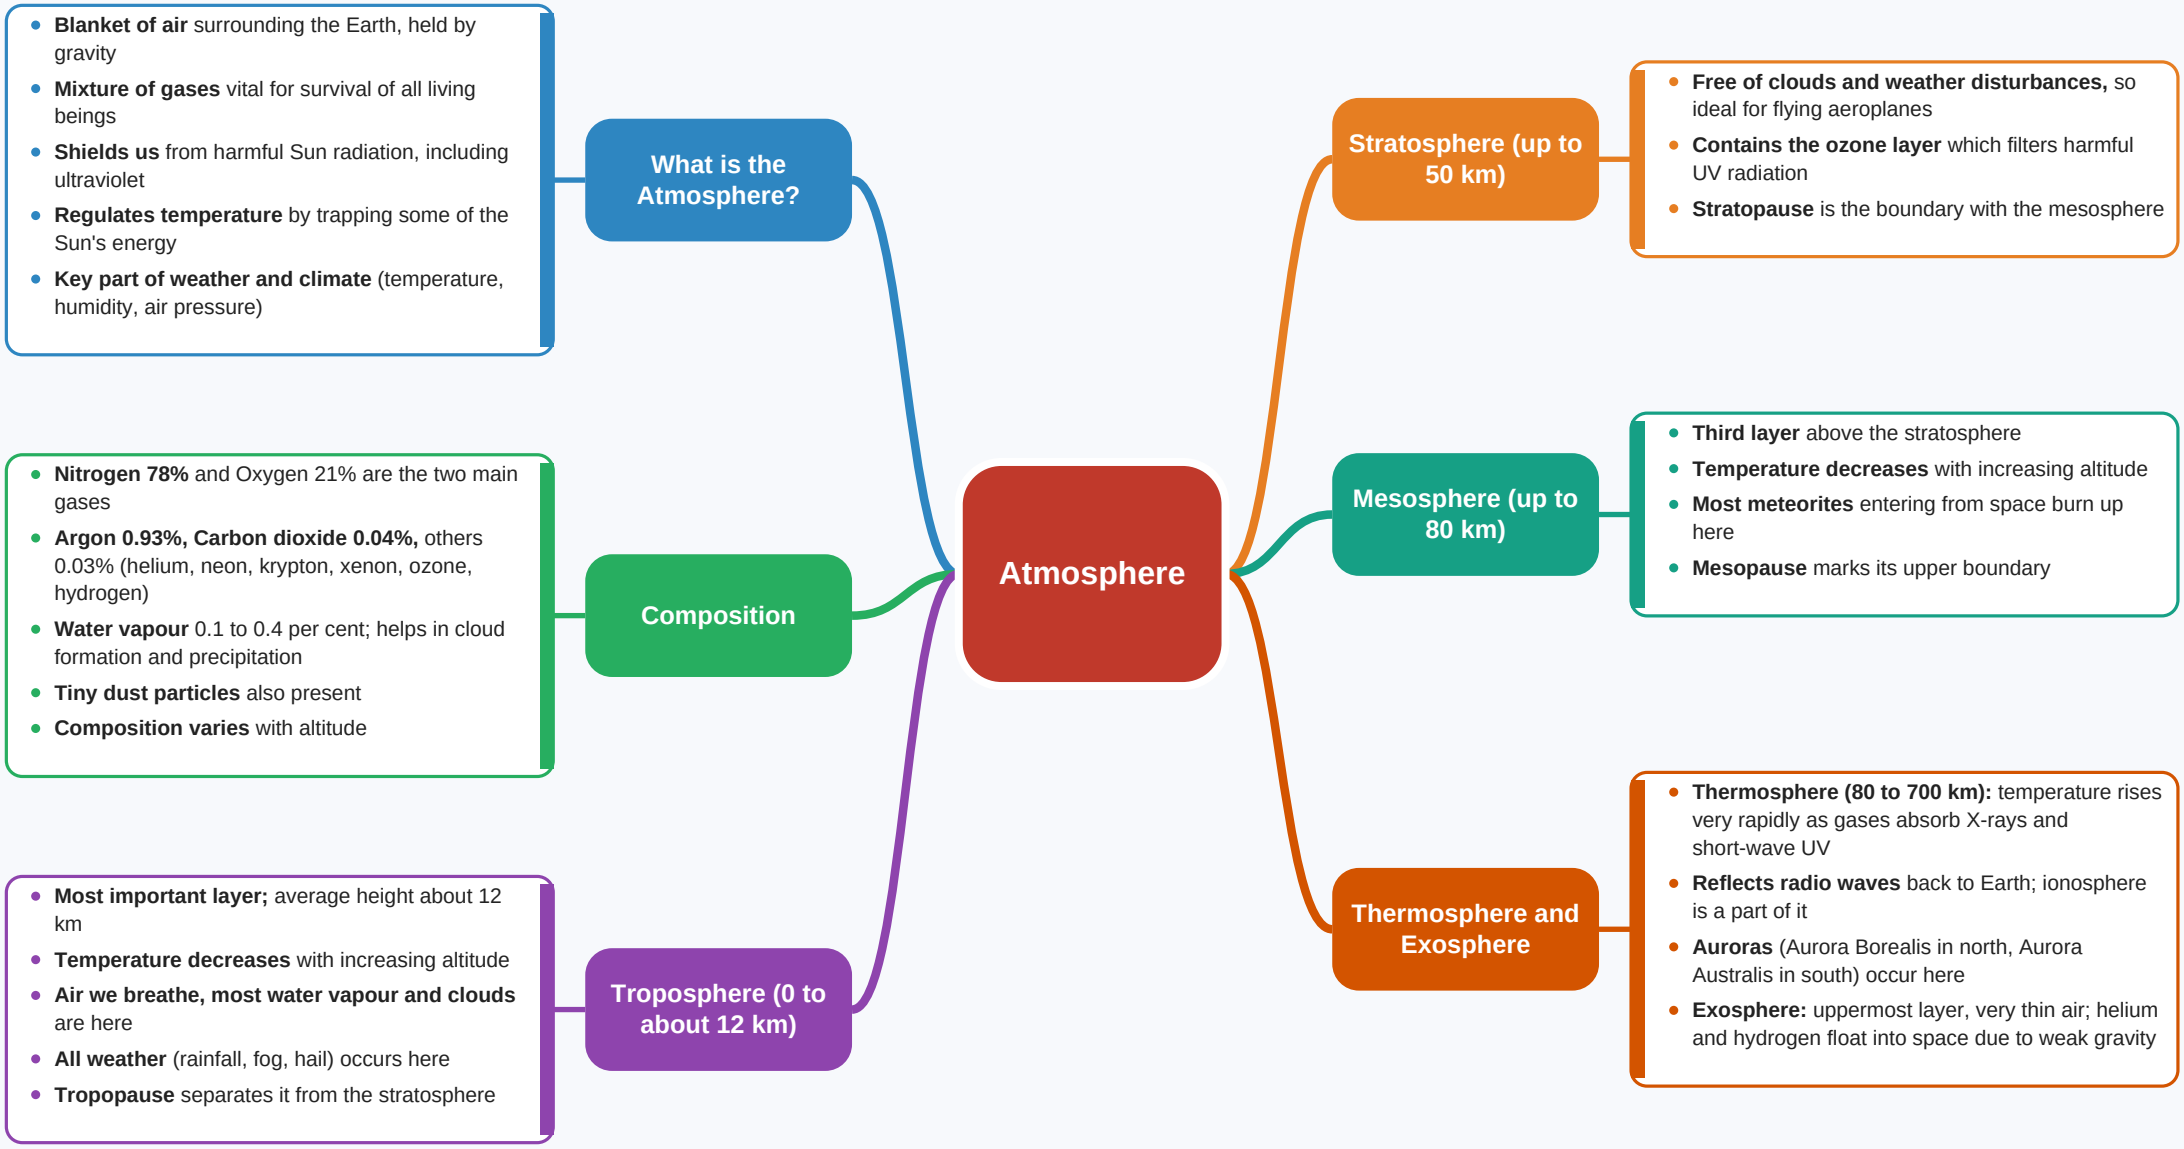
Mind Map 1: Atmosphere



Don't miss out: Temperature decreases with altitude only in troposphere and mesosphere. We do not feel air pressure because our body exerts equal counter-pressure.

Mind Map 2: Weather and Climate

Don't miss out: Winds are named after the direction they blow FROM. Climate of India is classified as tropical monsoon.

Mind Map 3: Monsoon and Climate Change

Don't miss out: Monsoon gives overall climatic unity to India. Every small step counts in reducing our carbon footprint.
